100% OF PROCEEDS TO BENEFIT:

Farmers Relief Agency

Rotary

Clubs of South Australia

THERE ARE CURRENTLY OVER 650 FARMERS REGISTERED
FOR FODDER RELIEF IN SOUTH AUSTRALIA

WHAT IS A GREEN DROUGHT?

A GREEN DROUGHT HAPPENS WHEN CROPS AND PASTURES LOOK HEALTHY BUT LACK ENOUGH MOISTURE BENEATH THE SURFACE, MEANING THEY CAN'T GROW PROPERLY. IT'S INVISIBLE, YET DEVASTATING.

LIVESTOCK STRUGGLES

EVEN WITH GREEN PASTURES, LIVESTOCK FEED QUALITY SUFFERS, LEADING TO MALNUTRITION AND HIGHER COSTS FOR FARMERS WHO NEED TO BUY EXTRA FEED TO SUSTAIN THEIR HERDS.

IMPACT ON FARMERS

DESPITE APPEARANCES, CROPS LIKE WHEAT, BARLEY, AND CANOLA STRUGGLE TO GROW DUE TO INADEQUATE SOIL MOISTURE. THIS LEADS TO POOR YIELDS AND LOWER INCOME FOR FARMERS WHO ARE ALREADY FACING TOUGH TIMES.

FINANCIAL STRAIN

FARMERS ARE ALREADY UNDER PRESSURE. GREEN DROUGHTS MEAN HIGHER COSTS FOR WATER, FEED, AND EQUIPMENT, WHILE INCOMES DROP BECAUSE CROPS DON'T YIELD AS EXPECTED.
